

I depend totally on captioning to understand what is said on TV. I am not deaf. I have a severe high frequency hearing loss and can usually get by without a hearing aid. There are 28 million Americans with hearing loss! Yet our local news and weather programs are not captioned. I am dismayed when I see that new movies have not been captioned or that popular educational programs like Sesame Street are not captioned. Please make certain that captioning remains a priority! Thank you so much.
